CARGOSHARKS · SALES

Kuwait Prospect Call Sheet

Fifteen forwarders, ranked — and the two things to settle first

Prepared by	techpotions
Date	24 August 2026
Question asked	Which Kuwaiti companies can we approach this week, and what do we say?
Source of the list	The FIATA Kuwait members directory (31 forwarders), cross-checked against company websites and trade directories on 24 August 2026. Al-Qabandi is on that same directory page — see §1.
Relationship to the research	Applies `Gulf_Market_Analysis.md` §4 ("Kuwait is the proving ground, not the market") to the one question it does not answer: if you *are* going to sell in Kuwait, to whom, and on what argument.
Status	Contact data gathered from public sources. Two commercial blockers are unresolved — §1.

> **The finding in one line:** the callable Kuwaiti market is about fifteen companies, the ones worth calling first are those with a second entity outside Kuwait — because that is where the deadline is — and you have three working days before Mawlid closes the week.

---

1. Read this before you dial

Two things are unresolved, and neither is a detail.

The resale question is still open. `Gulf_Market_Analysis.md` §9 lists it as Q1, owner *techpotions / legal*, blocking *everything*: does the Al-Qabandi engagement permit resale of the platform? Nothing in the repository records an answer. Every name below is a company you would be selling Al-Qabandi's platform to, so this is the first call of the day, and it is internal.

Every target is Al-Qabandi's direct competitor. This is not incidental — Al-Qabandi & Partners is listed on the very FIATA Kuwait page this shortlist was built from, at Fahad Al Salem Street, three entries above Al Rashed. Kuwaiti forwarding is a small trade with a shared association directory. Assume anything you say in a meeting reaches Al-Qabandi within the week.

Three consequences worth accepting rather than working around:

- **Lead with the product, not the pedigree.** `packages/brand` makes the operator a parameter; the product was built to be whitelabelled. Sell CargoSharks, not "the system we built for Al-Qabandi."
- **Do not name Al-Qabandi as a reference** until Q5 is answered by the account. Naming them uninvited converts a design partner into a party with a grievance.
- **Consider telling Al-Qabandi first.** A forwarder who hears from a competitor that their software vendor is selling next door has been surprised; one who was asked has been consulted. The second conversation is cheaper.

2. The calling window

Kuwait works **Sunday to Thursday**, roughly 08:00–16:30, UTC+3.

DAY	
Mon 24 Aug	Working — today
Tue 25 Aug	Working
Wed 26 Aug	Working — last full day
Thu 27 Aug	**Public holiday — Prophet's Birthday**
Fri 28 – Sat 29	Weekend
Sun 30 Aug	Offices reopen

Three days, not five. That is the honest reason to call today rather than build a better list first — and it is also a usable closing line, because everyone you ring is working to the same short week.

3. How this list was filtered

The spine is the **FIATA Kuwait individual members directory** — 31 companies. A forwarder who pays FIATA dues issues FBLs, sits inside a documentation standard and has already decided that paperwork discipline is worth money. That is the cheapest available filter for "will pay for software."

Then, three cuts:

Too big to sell to. Agility, KGL, GAC, DHL Global Forwarding, Expeditors, Maersk/Damco, PostaPlus. Global groups run global systems and the procurement decision is not made in Kuwait. Agility carries a further problem — §6.

Too small to sell to. The one-desk cargo shops in Dajeej and Murqab. A per-customer deployment does not price down to them, and pretending otherwise wastes the week.

Ranked by whether a second entity exists. This is the argument that matters, and it comes straight out of the research: `Gulf_Market_Analysis.md` §4 found that **Kuwait has no compliance deadline** — no VAT, no VAT law, ruled out before 2028 — so nothing in the country forces a forwarder to replace working software. The urgency has to be imported. It comes from one of two places:

1. **A UAE arm inside the same group.** MPCI has a hard stop on **30 September 2026** — five weeks — and carriers are already refusing bookings without filing confirmation. A Kuwaiti group with a Dubai office has the deadline whether or not the Kuwait office feels it.
2. **A CargoWise renewal.** The December 2025 Value Pack move put costs up 20–50%. Worth asking on every call; it is the one question that turns a cold call into a dated one.

Tier A is the companies with the first. Tier B is the right size and shape but Kuwait-only — a slower, feature-led sale.

4. Tier A — multi-entity, call these today

Five companies. Each runs at least two national entities, which is the product's structural strength rather than a feature: multi-entity, multi-currency and per-branch invoice series are enforced by RLS policy across all 80 tables, not assembled in application code.

1 · Fusion Shipping & Logistics Co. W.L.L. — *call first*

Phone	+965 2495 4200
Email	sony.sebastian@fusionshipping.com
Web	fusionshipping.com
Where	Waha Mall, Offices 35G–38G, Dajeej, Farwaniya (earlier listings: Elite Tower, 2nd Floor, Fahed Al Salem Street)
Named	Dr. Sony Sebastian; Mario D'Costa; Arun Ravindran; Jamal Dawod
Shape	Founded 2010. **Kuwait, Dubai, Abu Dhabi, Saudi Arabia, Iraq, UK.** ISO certified. Exhibition logistics, project forwarding, LCL consolidation, warehousing, defence logistics.

Why first. Six entities across five countries is the hardest version of the problem the platform was built around, and the UAE arm puts MPCI on their desk in five weeks. A named contact with a published email removes the switchboard. Defence and exhibition work both carry documentation and audit obligations, which is the half of the product that is database-enforced and insert-only.

The hook. Ask how Kuwait, Dubai and Riyadh reconcile today. If the answer is a spreadsheet per entity, you are in the right room.

2 · Top Terminal Logistics (TTL)

Phone	+965 2228 9172
Web	ttl-co.com (contact form; LinkedIn/Instagram @ttl_logistics)
Where	Dalal Mall, Office 6, Mezzanine, 6th Ring Road, Dajeej — also listed at Boubyan Complex, Office 19
Shape	**Kuwait, Dubai (Port Saeed, Deira), Alexandria (shipping agency).** Land FTL/LTL, sea, air; clearance; IOR/EOR/DDP; warehousing; project and temperature-controlled cargo.

Why. Three countries and a Dubai entity. They *market* Kuwait customs clearance publicly — Shuwaikh, Shuaiba and the land borders, with KUCAS compliance coordination — which means customs stage tracking, duty estimation and an SLA clock are features they already sell by hand.

The hook. IOR/EOR/DDP work lives or dies on document versioning and who signed what. That is `0003_audit.sql`, not a roadmap item.

3 · TransCrate Logistics Trading Co. W.L.L.

Phone	+965 1804949 · fax +965 2244 7723
Web	transcrate.com

Where	Mirqab, Jasim Boodai Street, Office 23, Block 3, Plot 31 · Dubai: Parklane Building, Office 1819, Business Bay, +971 4 238 6479
Shape	Founded 2014. Kuwait + Dubai. Freight management, customs clearance, e-commerce fulfilment, reverse logistics, moving.

Why. Young enough to have no twenty-year legacy system to rip out, and e-commerce fulfilment plus reverse logistics means shipment counts high enough that manual operations hurt. Two entities.

The hook. Their public tracking accepts an airway number and nothing else. The customer portal, the public `/track` page and the per-customer read-only API are built and demonstrable in the same session.

4 · Seguro Shipping Company

Phone	+965 2240 2603 · +965 2240 2604 · +965 2228 0773
Email	management@seguroshipping.net
Web	seguroshipping.net
Where	Al-Salhiya, Al-Soor Street, Marzook Building (FIATA lists Adil Tower, Ali Al Saleem Street, 30th Floor)
Shape	Kuwait + **Cochin** + **Mumbai**. NVOCC, FCL/LCL, air consolidations, GCC overland, customs broking, project cargo, Iraq door delivery.

Why. Three entities and an NVOCC licence — an NVOCC issues house bills at volume, and the house B/L with a per-branch numbering series shipped and renders through Chromium with Arabic shaping. A `management@` address that is published is an unusually short path to a decision-maker.

The hook — and a test worth running. They work the India–Gulf corridor, which is exactly where **Shipmnts** competes hardest (`MK-06`). If they are already looking at an India-first product, ask them to enter a KWD amount and print it. `MK-07` flags this as unverified on our side too: an INR-first system built around two decimals may mishandle three, and KWD at three decimals is a correctness fault, not a preference. Do not assert it — ask them to check.

5 · Amiral Shipping Co.

Phone	+965 2262 6066
Web	amiral.com.kw
Where	Hawally, Ibn Khaldoun Street, Cairo Complex, 3rd Floor
Shape	Multimodal — sea, air, overland, cargo in transit, customs clearance, project cargo. Agent network across Dubai, Saudi, Qatar, Bahrain, Oman, Jordan, Egypt, Lebanon, plus Europe, Asia-Pacific and the Americas.

Why. The agent network *is* the business, and it is the part of the product with the least competition: an overseas agent signs in at the same form, lands in `/agent` , and sees a job because their partner is named on it — the policy keys off the partner, not a branch. Partner settlement and netting shipped alongside it.

The hook. Ask what happens today when a Dubai agent wants a status. If the answer is "they email us and we look," the agent portal demonstrates itself.

5. Tier B — right size, Kuwait-only, call Tuesday and Wednesday

No imported deadline, so these are feature-led and slower. Ordered by fit.

#	COMPANY	PHONE	EMAIL / WEB	WHY IT IS ON THE LIST
6	**Greenways Logistics Intl**	+965 2476 0381 / 2476 0581	admin@greenwayslogistics.com	NVOCC and LCL consolidation. Consolidation means master-to-house cost splitting, which is built (`core/grouping.ts`).
7	**Fast Logistics Co. W.L.L.**	+965 2228 0333	fastlogisticsco.com	Founded ~2015, claims 49,000+ shipments and 130,000 TEU from one office. Growth without a system is the cleanest pitch on this page.
8	**Aayan International Cargo**	+965 2239 3064	aayans.com	Sharq. Multimodal sea and air, FIATA member, mid-size.
9	**Crown Logistics Co. W.L.L.**	+965 2475 9295	info@crownlogisticsco.com	Al Hamra Mall, Farwaniya. FIATA member, generalist forwarder.
10	**Dana Kuwait Shipping & Forwarding**	+965 2245 8893	salesdks@dks-kwt.com.kw	Sharq. OPCA gold member — project cargo, which carries the heaviest documentation load per shipment.
11	**Al-Tamioz Global Shipping & Forwarding**	+965 2247 4742	sales@tamioz.com · global@tamioz.com	Al-Khalid Tower, Fahd Al-Salem Street. Two published sales addresses.
12	**UAGSCO Shipping & Logistics Co. W.L.L.**	+965 2246 1651 (ext. 107) · +965 9999 3042	shp@uagsco.com	Established 2000, Salhiya. Forwarding plus warehousing; privately managed, so the owner is the buyer.
13	**Dolphin Shipping & Logistics**	+965 2491 2151	dolphinkuwait.com	Office inside the Shuwaikh Port Authority building — a working-forwarder address, not a sales one.
14	**Associated Shipping & Logistics (ASL)**	+965 2431 3477	varghese@asl.com.kw	Dajeej, Farwaniya. **Verify first** — the domain did not resolve on 24 Aug 2026; the company may have moved or folded.
15	**Al Rashed International Shipping Co. (K.S.C.C.)**	+965 2291 2800 / 2243 6550	aris@al-rashedgroup.com	Founded 1952. Shipping agency, chartering, clearance, forwarding, warehousing. Larger and family-held — a long sale, but the most recognisable Kuwaiti logo available to you. Call last, or first if you want a reference name more than a quick close.

6. Do not call

	WHY NOT
Agility	Beyond size: Agility is majority shareholder in Global Clearinghouse Systems, the JV holding the 25-year BOT concession that runs Kuwait customs on **MicroClear** until 2030 (`MK-03`). They are simultaneously the largest competitor to every name above and the gatekeeper of the customs integration you cannot build. Nothing good comes of this call.
KGL Logistics	State-linked scale, own systems, procurement unlike anything on this page.
GAC, DHL Global Forwarding, Expeditors, Maersk/Damco, PostaPlus	Global groups on global platforms. The Kuwait office cannot buy this.
One-desk cargo shops	Andhra Cargo, Alkhesal, Al-Saifeen and similar. Will not fund a per-customer deployment; a free trial they never configure costs you a week.

7. What to say

The cold call — thirty seconds

> "Morning — is [name] there? … I'm [X] from techpotions, here in Kuwait. One question and I'll be quick: you run Kuwait and Dubai as separate companies — are those on one system today, or two sets of books?
>
> The reason I ask — we've built the operating system for a forwarder where running several entities is the foundation rather than a module you add. And it's genuinely Arabic, not an English product with Arabic switched on.
>
> Twenty minutes on a screen, Tuesday or Wednesday? It's a short week — Thursday's the holiday."

Then stop talking. If they run one entity, drop the opener and ask what they use today; if the answer is Excel and email, that is a better conversation than a competitive displacement.

The follow-up email — English

> **Subject: A forwarding system that speaks Arabic and gets KWD right**
>
> Dear [name],
>
> Thank you for the moment on the phone. In one paragraph, in case it is useful to a colleague:
>
> We build CargoSharks — booking, documents (house B/L, house AWB, delivery order, packing list, customs pack), customs stages, and invoicing, for freight forwarders. Three things usually decide it:
>
> - **Arabic and English are equal.** Every screen, every document, right-to-left throughout. Not a translation layer added later.
> - **Your data stays yours.** We deploy a separate database per customer. Nothing is shared, and nothing is deleted — records are superseded and the history is kept, enforced by the database.
> - **KWD is handled at three decimals**, correctly, in every document and report.
>
> Twenty minutes on a screen share suits most people better than a document. Tuesday or Wednesday this week, or Sunday after the holiday?
>
> Kind regards, [name] · techpotions, Kuwait

The follow-up email — Arabic

> **الموضوع: نظام لإدارة الشحن — بالعربية، وبالدينار الكويتي بثلاث خانات عشرية**
>
> تحية طيبة وبعد،
>
> شكراً لوقتكم على الهاتف. باختصار، إن أردتم مشاركتها مع زميل:
>
> نحن شركة techpotions في الكويت، وقد طوّرنا منصة تشغيل متكاملة لشركات الشحن والتخليص: الحجوزات، والمستندات (بوليصة الشحن الفرعية، وبوليصة الشحن الجوي الفرعية، وأمر التسليم، وقائمة التعبئة، وملف البيان الجمركي)، ومراحل التخليص، والفوترة.
>
> ثلاث نقاط عادةً ما تحسم القرار:
>
> - **العربية والإنجليزية متساويتان.** كل شاشة وكل مستند، ومن اليمين إلى اليسار بالكامل — وليست ترجمة أُضيفت لاحقاً.
> - **بياناتكم تبقى لكم.** نُنصّب قاعدة بيانات مستقلة لكل عميل. لا مشاركة مع غيركم، ولا حذف — السجلات تُستبدل ويُحتفظ بتاريخها، بضمان من قاعدة البيانات نفسها.
> - **الدينار الكويتي يُحتسب بثلاث خانات عشرية** بشكل صحيح، في كل مستند وتقرير.
>
> عرض مباشر على الشاشة لمدة عشرين دقيقة عادةً أنفع من أي ملف. هل يناسبكم الثلاثاء أو الأربعاء هذا الأسبوع، أم الأحد بعد العطلة؟
>
> وتفضلوا بقبول فائق الاحترام،
> [الاسم] · techpotions — الكويت

---

8. What not to promise

Four of these will come up on a first call. Answering them straight is worth more than the sale you would lose by hedging.

IF THEY ASK	SAY
"Does it file with Kuwait customs?"	**No, and be direct.** Access runs through MicroClear under a concession majority-owned by Agility, and there is no route in (`MK-03`). The platform tracks declarations, numbers, duty estimates and the SLA clock; it does not file. Anyone promising you Kuwait single-window filing is guessing.
"Are you an accredited e-invoicing provider?"	**No, and we will not be.** UAE ASP accreditation requires a two-year operating history (`MK-04`). We generate the structured document and hand off to an accredited provider — the adapter exists.
"Who else runs this?"	Al-Qabandi is the design partner — **but do not name them until Q5 is answered.** Until then: one Kuwaiti forwarder built it with us and it is going live.
"What does it cost?"	**Do not quote.** Every figure in `pricing.md` is a placeholder. Take the requirement away and come back with a number you will honour.
"How do we know it works?"	The honest answer, which is stronger than it sounds: Playwright covers every screen in both languages, on fixtures and against a live database, across 104 test files, and CI runs both stages. What we do not yet have is years of production history — `MK-05` says their IT reviewer asks this before they ask about features, so have the answer ready rather than discovered.

9. Before the next list

#	QUESTION	OWNER	BLOCKS
P1	Does the Al-Qabandi contract permit resale? (= Q1)	legal	Every call on this page
P2	Do we tell Al-Qabandi before or after the first meeting?	account	The relationship, not the sale
P3	Which of these fifteen are on CargoWise today?	commercial	Turns a cold list into a dated one — ask on every call and record it here
P4	Is the Kuwait pitch worth it at all, versus the same week spent in Dubai?	commercial	`Gulf_Market_Analysis.md` §4 says the buyers are in Dubai and Riyadh. This page does not overturn that finding — it works within it. Fifteen calls is a cheap test of whether Kuwait pays; a month is not.

10. Sources

Accessed 24 August 2026.

- FIATA Members Directory — Kuwait — the 31-company spine of this list
- Cargo Yellow Pages — Kuwait freight forwarders A–F and G–Z
- Company websites: Fusion Shipping, Top Terminal Logistics, TransCrate, Seguro Shipping, Amiral Shipping, Greenways Logistics, Fast Logistics, UAGSCO, Al-Rashed Group

- Fusion Shipping & Logistics — Dun & Bradstreet profile
- Kuwait customs clearance — Shuwaikh, Shuaiba and land borders (TTL)
- Prophet's Birthday 2026 — Gulf public holidays, Khaleej Times and Birthday of Prophet Muhammed in Kuwait, Office Holidays
- Internal: `Gulf_Market_Analysis.md` §2, §4, §5, §9 and findings `MK-03` – `MK-07`

A caution on the numbers. Phone numbers and addresses were taken from trade directories and company sites, and both go stale — several listings still carry seven-digit Kuwaiti numbers from before the 2009 renumbering. Check the company's own site before dialling, and treat entry 14 as unverified.
